Equipment Supplier Manual

Lifesaving Operations

2018-19

This document aims to provide a reference and guide to SLSNR clubs/members for:

- Purchasing equipment
- Servicing equipment
- Identifying new equipment options
- Sourcing quotes for funding applications

The prices provide in this document are valid for June 2018 and should be used as a guideline only. To confirm prices, suppliers need to be contacted for a quote.

When contacting suppliers be sure to advise them of your affiliation with SLSNR in order to obtain any special discounts available.

Resusci Anne QCPR Manikins

Resusci Anne QCPR is an adult CPR training manikin now improved for multiple feedback options that provide opportunity to focus on student competency. Measurement, assessment and quality feedback are key factors in developing competency

Resusci Anne QCPR is built with the purpose to:

- Measure CPR performance
- Assess the results of the performance
- Facilitate good Feedback to the instructor

The new feedback devices provide learners with:

- Clear feedback on how to improve their performance
- The opportunity to improve competency through debriefing
- New possibilities to coach even more effectively 'real time' and to save and analyse training records

QCPR manikins come in a variety of options depending on the level of training and number of interventions the manikin can have performed on it.

* Remember to order feedback devices separately - Not included with the CPR manikins.
